

American Cierra Corporation

Breakthroughs and Innovations

American Cierra Corporation has developed a wash and recycling system that is specifically designed for the Caribbean Islands' recycling program. Although it can be used for any Recycler requiring a small inexpensive recycling plant. The system includes a new High Attrition Washer with Hydro Cyclone Separation, and a Turbo Centrifugal Dryer. This line produces 2,000 lbs. per hour. Other lines can be manufactured to produce much higher rates.

Information about this efficient yet economical new line can be obtained by calling our office at 315-252-6630 or emailing Paul@cierrainc.net or Warren at sierrarc@aol.com
